

Recruit Canola WP

Endophytic Trichoderma root inoculant for improved growth and productivity.

Active ingredient: Trichoderma spp
(- min. 7×10^8 CFUs per gram)

Apply as seed dressing at seeding time, to establish beneficial Endophytic Trichoderma in the early stages of plant development OR can be applied directly into the liquid stream, onto the seed

Positioning:

- "Endophyte" - living inside plant
- Target zone - Rhizosphere
- Key role in communication
 - Receive signals from plant (plant's needs, growth stage, stress conditions)
- Respond to plant's need by:
 - Recruiting functional groups to rhizosphere
 - Communicating plant's needs to rhizosphere team
 - Communicate back to plant (interaction with genetics of plant, up-regulating metabolic pathways, etc.)
- Actively participate in plant's metabolism
- The switching on of gene pathways is a dynamic process.
- Can be used in conjunction with Wilchem Bioteam to stimulate Rhizosphere microbes

Directions for Use:

- Premix with rain water and apply in furrow on the seed, or
- Seed treatment:
 - Use 5-10L liquified Recruit / tonne of seed to ensure every seed is covered

Crop	Rate	Timing
Canola - Seed Treatment	60g per 250kg Seed	Dissolve 60g in 5-10L of non chlorinated water, add 0.5% BiopHilm (25mL/5L), apply at seeding with appropriate applicator, like a scud or similar
Canola - Liquid Inject	0.5g / ha	Add Recruit Canola and BiopHilm at 0.5% premixed with non-chlorinated water to the appropriate amount of fertiliser mixture for liquid injection at seeding

Other Details:

- Endophytic Trichoderma, quickly enters the plant, and once inside produce metabolites via a symbiotic relationship that switch on genes. This action induces positive responses in germination, growth and vigour.
- Improved photosynthesis and root development for optimization of water use efficiency and yield development.
- Do not use with chlorinated water or water that has been treated with anti-microbial compounds

IMPORTANT NOTES:

Contents may settle. Shake well before use. Keep in a cool (4°C to 24°C) place. Do not allow to freeze. Store out of direct sunlight. Do not use product after expiry date.
